

Elements of a Care Plan in Medical Respite Settings

December 2022

INTRODUCTION & PURPOSE OF THIS RESOURCE

Medical respite care (MRC), also referred to as recuperative care, is acute and post-acute care for people experiencing homelessness (PEH) who are too ill or frail to recover from an illness or injury on the streets or in shelter, but who do not require hospital-level support. MRC programs offer short-term residential care that allows individuals experiencing homelessness the opportunity to rest, recover, and heal in a safe environment while accessing medical care and other supportive services.

PEH typically present in MRC settings with complex and interconnected medical, social, and behavioral health needs. Effectively meeting these needs and providing whole-person care that is consistent with the [Standards for Medical Respite Care Programs](#) necessitates comprehensive and responsive care planning, from admission through discharge and beyond.

MRC programs’ size, structure, personnel, and services vary greatly based on their local needs and available resources. Accordingly, this guide is *not* intended to represent a prescriptive, all-encompassing approach to service delivery in MRC settings. Rather, it aims to:

1. Provide a reference-point to assist MRC programs in developing their own care planning tools that are appropriate to their unique contexts and the needs of PEH in their communities.
2. Help partners and stakeholders interested in learning more about MRC to understand the scope and complexity of the services provided within MRC programs.

Our team at the National Institute for Medical Respite Care (NIMRC) hopes that this resource will be useful in supporting programs and communities as they strive to offer high-quality care for PEH.

HEALTH PROGRESS NOTE.....	9
CASE MANAGEMENT ASSESSMENT & GOAL PLANNING	14
CASE MANAGEMENT PROGRESS NOTE	18
APPENDIX A: HEALTH ASSESSMENT EXAMPLE	21
APPENDIX B: CASE MANAGEMENT ASSESSMENT EXAMPLE	27

OVERVIEW:

Intake and orientation:

- Discuss the purpose of the program and guidelines/expectations
- Discuss primary reason for referral/admission
- Obtain informed consent
- Discuss discharge timeframe and/or discharge indicators

**Health care may be provided by medical respite program staff or in partnership with another agency, based on the program model.*

Case management assessment and goal planning:

- Build rapport and engagement
- Identify barriers and needs
- Identify strengths and resources
- Collaboratively develop patient-centered goals

Health assessment and goal planning

- Review hospital records to identify current conditions and treatment goals
- Complete history & physical exam
- Complete mental health and substance use screening/assessment
- Collaboratively develop a patient-centered treatment plan

Resource navigation:

- Obtain documentation necessary to access housing, income, and other resources
- Connect and engage with local Continuum of Care (e.g., HMIS and Coordinated Entry)
- Complete various applications (e.g., housing, insurance, employment, SSI/SSDI, etc.)
- Arrange transportation to/from appointments

Health monitoring, management, and navigation:

- Monitor health condition(s) and adjust care plan, as needed
- Medication management and/or reconciliation
- Provide ongoing health literacy and disease management education
- Connect to primary care and specialists
- Connect to mental health and/or substance use treatment, as indicated

Discharge planning and continuity of care:

- Collaboratively determine discharge disposition with patient:
 - E.g., permanent supportive housing; family/friends; shelter; recovery program; etc.
- Warm handoff to ongoing community-based case management/housing navigation
- Document and share goals and progress with key stakeholders, as permitted

Discharge planning and continuity of care:

- Schedule follow-up appointments (e.g., primary care, mental health/substance use)
- Equip patient with knowledge and resources to refill medications
- Provide patient with discharge summary
- Notify partnering providers of patient's discharge and provide relevant information needed to maintain contact with patient

<u>Pharmacy & Pharmacy Contact Information:</u> <i>Walgreen's [address; phone]</i>	
<u>Home Health Provider (If applicable) & Contact Information:</u> <i>n/a</i>	

History of Present Illness/Hospital Course:

Ms. Brown is a 52-year-old, Black female who presents to respite care following the amputation of her right great toe due to a diabetic foot wound and subsequent osteomyelitis. She was in the care of NP Smith at Community Health and was seen at West Wound Care Clinic prior to her planned admission for amputation. She has a past medical history of type II diabetes, hepatitis C, opioid use disorder, depression, PTSD, and tobacco use. Prior to her hospital admission she was going between friends' houses and staying outside in an encampment downtown.

Per discharge paperwork her R great toe amputation was somewhat complicated by pain in the setting of starting buprenorphine/naloxone 8/2mg BID two weeks prior to the planned surgery, prescribed and managed by PCP. During her hospital course she received dilauded via a PCA which was titrated down. She is now taking buprenorphine/suboxone 8/2mg TID and ibuprofen 600mg Q8H PRN and pain is controlled.

Prior to admission she was struggling to manage her diabetes due to unstable housing and available diet.

She has struggled with opioid use disorder since age 17 and reports a 2-year period of sobriety/use of buprenorphine/naloxone two years ago.

No current discharge plans; needs support with housing.

Primary Diagnosis/Reason for Admission:

- *Wound care s/p amputation of R great toe*
- *Diabetes*

Secondary Diagnoses:

- *Hepatitis C*
- *Opioid Use Disorder*
- *Depression*
- *PTSD*

Vital Signs:

Blood pressure: 132/82

Heart rate: 84

SPO2: 97% on room air

Respiratory Rate: 16

Temperature: 97.8

Height: 5'3"

Weight: 145lbs

Pain: 3/10

Review of Systems:

Cardiac: Denies history of cardiac disease, denies chest pain, trace edema of right foot

Respiratory: Reports smoking 1 PPD, started use of patch immediately prior to surgery but does not want to continue after discharge, willing to consider continuation of patch while at respite. Denies history of respiratory disease, had COVID in 2021, denies shortness of breath, comfortable appearing during assessment.

Neuro: Denies neurological history, denies seizures, denies past head injuries.

Endocrine: Diabetes, diagnosed 10 years ago, poorly controlled per pt. report and hospital discharge, last HgbA1c 9.2.

<p><i>Immune: Denies immune history, reports her PCP tests her for HIV annually, does not know date of last test.</i></p> <p><i>GI: Reports occasional diarrhea and constipation related to diet and opioid use.</i></p> <p><i>GU/Repro: Denies GU concerns, denies difficulty voiding, denies pain, uses condoms occasionally.</i></p> <p><i>Skin/Wounds: R great toe amputation site with stitches in place, well approximated, no erythema noted, trace edema of r foot. Wound care instructions are in discharge paperwork.</i></p> <p><i>History of injection related abscesses, multiple large scars on bilateral arms, shoulders.</i></p>
<p><u>Durable Medical Equipment (DME) Notes:</u></p> <p><i>Walking boot for R foot; Folding walker d/t toe amputation. Need for walker to be reassessed by PT</i></p> <p>DME Provider & Contact Information: <i>Referring hospital supplied</i></p>

<p><u>Medical History:</u></p> <p><i>Diabetes type II, hepatitis C (untreated), opioid use disorder, depression, PTSD, tobacco use disorder.</i></p>
<p><u>Surgical History:</u></p> <p><i>Amputation of R great toe 8/10/2022</i></p>
<p><u>Immunizations:</u></p> <p><i>COVID-19 Pfizer two-doses (June 2021)</i></p>

<p><u>Social History:</u></p> <p><i>Has two children from whom she is currently estranged, support community is friends in encampment. Long history of opioid use disorder, recently restarted suboxone and wants to continue. Goal to rebuild relationship with her children.</i></p>	<p><u>Substance Use History:</u></p> <p><i>Substance(s) of choice/mode of use: Heroin/fentanyl</i></p> <p><i>Most recent use: Last use was 8/9/2022 prior to hospital admission, uses intravenously or skin pops.</i></p> <p><i>Typical daily volume: 12 bags daily prior to starting suboxone.</i></p>
---	--

	<p>Concern for withdrawal: <i>Monitor</i></p> <p>Current/past use of medications for opioid use disorder: <i>Current Buprenorphine/naloxone 8/2mg (tablets) – PCP is suboxone prescriber.</i></p>
--	--

<i>Sulfa drugs</i>		

<p><u>Behavioral Health and/or Mental Status Screening Results (If applicable):</u></p> <p>Alert and oriented x: 4</p> <p>Behavioral health diagnoses: <i>Depression, PTSD. (Sees a Psych NP at Community Health Center, Rosa Smith).</i></p> <p>Pt. reported behavioral health concerns or triggers: <i>Reports ongoing stress related to not having a relationship with her children</i></p> <p>Results from specific screening tools: <i>n/a</i></p>

Clinical Assessment/Summary:

Ms. Brown needs respite support for wound care, support with diabetes management, including medication management and dietary support. She needs follow up with PT/OT related to ambulation s/p R great toe amputation. Need for support with tobacco and substance use goals. She was connected with PCP and wound care prior to hospital admission, needs to be reconnected to care. She needs support with housing options.

Care Preferences and/or Concerns Voiced by Patient:

*She is considering continuing the patch for nicotine replacement but has also reported that smoking is a coping mechanism for her.
She reports she is scared to return to the street, does not want to develop another foot wound.
She is nervous about having nightmares while at the respite, wants to make sure she gets her Prazosin at night.*

Education/Intervention(s) Provided:

- *Wound care – reviewed instructions and practiced*
- *Diabetic foot care*
- *Medication management*
- *Diabetic diet*
- *Smoking cessation: reviewed impact of smoking on wound healing*

Further Education/Reinforcement Needed:

- *Wound care: Reviewed instructions 8/17, needs reinforcement and physical practice with wound care.*
- *Smoking cessation: Discussed 8/17, reviewed impact of smoking on wound healing*

MEDICAL RESPITE TREATMENT GOALS: *(developed in collaboration with patient)*

<p><u>Diagnosis 1:</u> <i>R toe amputation</i></p>	<p><u>Goal 1:</u> <i>Progress with wound healing</i></p>
<p><u>Objective 1a:</u> <i>Perform wound care BID</i></p>	

<p>Objective 1b: <i>Understand signs and symptoms of infection and when to seek medical care</i></p>
<p>Objective 1c: <i>Understand diabetic foot care and how to prevent future foot wounds</i></p>

<p>Diagnosis 2: <i>Diabetes type II</i></p>	<p>Goal 2: <i>Manage blood sugars while in respite care, goal of fasting BG <150, post prandial <300</i></p>
--	---

<p>Objective 2a: <i>Check fasting blood glucose before breakfast, check post prandial blood glucose 1 hour after lunch or dinner.</i></p>
<p>Objective 2b: <i>Take medications daily as directed</i></p>
<p>Objective 2c: <i>Gain understanding in how dietary changes can impact diabetes</i></p>
<p>Objective 2d: <i>Learn about food resources in the community</i></p>
